

FIELD VISIT DURING WORKSHOP

at

Kalibangan in Rajasthan and Suketi Fossil Park in Himachal Pradesh

15th and 17th February 2017

Workshop on “Techniques of Geological, Geomorphological Mapping and Sampling Process for Geoscience Research” consists of two days field visits (15th and 17th February 2017). First, one day visit to Suratgarh and Kalibangan area of Rajasthan, where students were educated regarding sampling and mapping techniques in desert areas. Another one day field visit was at Saketi fossil park. Saketi Himachal Pradesh to give information about the fossils and rock record of Himalayas and formation processes of Himalayas. The workshop was full of information and helpful for the students in their project work and thesis work by getting information about various field and lab techniques. Supervisors and Coordinators of field visit were Dr. K. Milankumar Sharma and Dr. L.T. Sasang Guite.
