About the Speakers:

Prof. Sameer Brahmachari

J.C Bose National Fellow . Former Director General of the Council of Scientific and Industrial Research (CSIR) .

Founder Director Institute of Genomics & Integrative Biology

Mr. S. S. Kohli

Member Secretary, Apex Council - PM Fellowship Scheme; Scientist 'G', DST.

Ms. Shalini S. Sharma

Member Secretary, Apex Council - PM Fellowship Scheme; Senior Consultant & Head-Higher Education, CII

Scope:

The scope of the workshop is to elaborate the students with Prime Minister's fellowship scheme which is one of the most prestigious and competitive fellowship. The students will be attracted to join hands with industry during the fellowship period which will further enhance the job opportunities after Ph.D. It is envisaged that this scheme would eventually attract large number of talented students pursuing Ph.D. and will change the industry's mindset in investing in R&D and recruiting more Ph.D. scholars. Young investigators and Ph.D. scholars working in science, technology, engineering, agriculture and medicine and relevant areas are encouraged to register.

Registration Details:

Registration: Free

No TA/DA will be paid to the participants

Who can register: Young investigators, Academic advisors, Masters students who want to pursue PhD and Ph.D. scholars working in science, technology, engineering, agriculture and medicine and relevant areas.

For registration contact:

dstworkshopcupb@gmail.com

Last Date to Register: 30, April 2017

Central University of Punjab established by the act of Parliament in 2009 at Bathinda, is a fast growing Central university that offers some of the most innovative non-conventional academic programmes in science and technology, humanities, languages and social sciences designed in tune with the challenges of 21st century. The university has demonstrated its commitment to excellence and advanced learning through its unique interactive and experiential approaches. The University offers M.Sc., M.Ed., LLM, M. Tech. M.Pharm. and Ph.D. courses in 19 different centres. The university has air conditioned class rooms, world class laboratories, instrumentation facility, computer centre and automated library for research.
