Report on analysis of Feedback on curriculum received from other Stakeholders

The industry experts were contacted to get the feedback of the curriculum of different programmes offered by the University. A google form was sent to various stakeholders. Their information was analyzed and the following report is prepared after the analysis of feedback on curriculum by Stakeholders:

1. 91% of the Stakeholders have complied to the fact that the curriculum focusses to develop abilities to compete at international level.
2. 85% of the Stakeholders gave favourable comments that the topics were in sequence in the content of the curriculum.
3. 89% agreed upon the fact that an adequate and upto date reference of study material was available.
4. 91% of the Stakeholders think that the curriculum had provided them the opportunity for improving their thinking skills.
5. 90% have consented on the statement that there was a balance between theory and practical in the curriculum.
6. 86% were satisfied with the curriculum the course are adequate.
7. 85% accepted the fact that the lecture, tutorials and practical allotted in
8. 86% of the Stakeholders agreed that the content included in each unit of the curriculum was relevant and balanced.
9. 88% consented that the curriculum of the programme was explicit and details of the programmes were given.
10. 89% of the Stakeholders agreed that the curriculum helps to prepare for national level examinations.

Some points for improving curriculum are suggested by them, which are detailed as under:

1. We need to have a brief and short the course structure for 1st year students.
2. Internship is required.
3. The content is on the higher side and may be reduced.
4. It is suggested to add General Pharma applications of Instruments.
5. Introduction to some current trends/topics in chemistry must be included.
6. Some topics are repeated in the curriculum.
