11. Any suggestion for improvement of curriculum?

19 responses

Over all curriculum is very Good.

Curriculum is rigorously prepared and is up to date with the current needs of the market, A dedicated Tax filling course is something i have never heard of, it will definitely make one ready to earn if one wants to right after degree, secondly i would have suggested to inculcate some portion of financial modelling and data analysis but it is already available in the curriculum and extensively covered, so i am writing it with immense pleasure that this course structure is the most comprehensive and holistic i have ever gone through , it not only covers the theoretical portion but also the practical skills that are put to use in real world, in indian context banking insurance jobs at initial 5-10 years revolve around operational management that too has been given adequate importance in this course, to get things done you need to be aware of other persons psychology that's covered as well. All in all i would end up writing accolades about the course structure the more i wrote, the only suggestion i would be able to provide is to put check and balances to ensure quality program delivery in its true sense. I wish all the very best to you and your team may you be successful in delivering what you have aspired to.
