

GEOLOGICAL FIELD INVESTIGATION

Curriculum geological field training for M.Sc. Geology student was carried out under the supervision of Dr. Jitendra Kumar Pattanaik and Dr. K. Millankumar Sharma during 6th May to 11th May 2017. This field training was a part of 2nd and 4th semester course curriculum of M. Sc. Geology program. Different field traverse were conducted in and around Tohsam, Kaliyana, Mahendragarh and Khanak localities of Haryana. During this field training students were learned how to use toposh-eets in the field for demarcating lithological contact and structural information. Students were also prepared lithological map of the area. Various rock samples were collected from the field for teaching lab and for further study. Students were also collected flexible sandstone from Kaliyana area.
